## 4 Finite State Machine [50 points]

You are given the following FSM with two one-bit input signals  $(T_A \text{ and } T_B)$  and one two-bit output signal (O). You need to implement this FSM, but you are unsure about how you should encode the states. Answer the following questions to get a better sense of the FSM and how the three different types of state encoding we dicussed in the lecture (i.e., one-hot, binary, output) will affect the implementation.

(a) [3 points] There is one critical component of an FSM that is *missing* in this diagram. Please write what is missing in the answer box below.

| The reset line or indication for initial state. |  |  |  |  |
|---|--|--|--|--|
|   |  |  |  |  |
|   |  |  |  |  |
|   |  |  |  |  |
|   |  |  |  |  |
|   |  |  |  |  |
|   |  |  |  |  |

(b) [2 points] Of the two FSM types, what type of an FSM is this?

| Moore |
|-------|
|       |
|       |
|       |
|       |
|       |
|       |

Final Exam Page 10 of 40

(c) [5 points] List one major advantage of each type of state encoding below.

| One-hot encoding | reduces next-state logic  |
|------------------|---------------------------|
| Binary encoding  | d EE- 4- b-ld-4-4-        |
| binary encoding  | reduces FFs to hold state |
| Output encoding  | reduces the output logic  |

(d) [10 points] Fully describe the FSM with equations given that the states are encoded with **one-hot** encoding. Assign state encodings such that numerical values of states increase monotonically for states A through D while using the **minimum** possible number of bits to represent the states with one-hot encoding. Indicate the values you assign to each state and simplify all equations:

```
State assignments: A: 0001, B: 0010, C: 0100, D: 1000 NS[3] = TB * TS[3] + TS[2] \\ NS[2] = TB * TS[0] + TA * TS[1] \\ NS[1] = TB * (TS[0] + TS[3]) \\ NS[0] = TS[1] * TA \\ O[1] = TS[0] + TS[1] \\ O[0] = TS[1] + TS[2]
```

Final Exam Page 11 of 40

(e) [10 points] Fully describe the FSM with equations given that the states are encoded with **binary** encoding. Assign state encodings such that numerical values of states increase monotonically for states A through D while using the **minimum** possible number of bits to represent the states with binary encoding. Indicate the values you assign to each state *and* simplify all equations:

```
State assignments: A: 00, B: 01, C: 10, D: 11  NS[1] = \overline{TS[1]} * (\overline{TS[0]} * TB + TS[0] \overline{TA}) + TS[1] * (\overline{TS[0]} + TS[0] * TB)   NS[0] = \overline{TS[1]} * \overline{TS[0]} * \overline{TB} + TS[1]   O[1] = TS[1]   O[0] = TS[1]  XOR  TS[0]
```

(f) [10 points] Fully describe the FSM with equations given that the states are encoded with **output** encoding. Use the **minimum** possible number of bits to represent the states with output encoding. Indicate the values you assign to each state *and* simplify all equations:

```
State assignments: A: 10, B: 11, C: 01, D: 00 

NS[1] = TS[1] * TS[0] * TB + TS[1] * TS[0] * TA + \overline{TS[1]} * \overline{TS[0]} * \overline{TB}
= TS[0] * TB + TS[1] * TS[0] * TA
NS[0] = TS[1] * \overline{TS[0]} + TS[1] * TS[0] * \overline{TA} + \overline{TS[1]} * \overline{TS[0]} * \overline{TB}
= TS[1] * (TS[0] + TS[0] * \overline{TA}) + \overline{TS[1]} * \overline{TS[0]} * \overline{TB}
O[1] = TS[1]
O[0] = TS[0]
```

Final Exam Page 12 of 40

- (g) [10 points] Assume the following conditions:
  - We can only implement our FSM with 2-input AND gates, 2-input OR gates, and D flip-flops.
  - $\bullet$  2-input AND gates and 2-input OR gates occupy the same area.
  - D flip-flops occupy 3x the area of 2-input AND gates.

Which state encoding do you choose to implement in order to **minimize the total area** of this FSM?

| one-hot: 10 logics 4 FFs binary: 16 logics. 2 FFs output: 10 logics. 2 FFs |  |  |  |  |
|--|--|--|--|--|
| Output encoding has the least amount of circuitry elements.                |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
